EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James B.

Robinson on 02/24/05.

The application has been amended as follows:

IN THE SPECIFICATION

2. On page 1, as the first sentence following the title, "This application claims priority from U.S. Provisional Application No. 60/244,262 filed on October 30, 2000, and incorporates said Application herein in its entirety" has been inserted.

IN THE CLAIMS

3. This application is in condition for allowance except for the presence of claims 14-30 & 34-36 to an invention non-elected without traverse. Accordingly, claims 14-30 & 34-36 have been cancelled.

4. In claim 2 @ line 2, "polymer" has been deleted and "homopolymer" has been inserted in its stead so as to maintain claim language consistency.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance: The instantly claimed invention elected embodiment) is deemed allowable over the prior art of record as per an acceptably filed Terminal Disclaimer and as per said art neither anticipating nor rendering obvious the precisely defined aqueous coating formulation comprising a) a cationic homopolymer or copolymer, b) a fabric softener, c) urea, and d) ammonium oxalate or ammonium tartrate, as claimed. One having ordinary skill in the art would have not been endowed with any motivation to extrapolate, from any of the prior art disclosures, the precisely defined combination of cationic homopolymer or copolymer, fabric softener, urea and ammonium oxalate or ammonium tartrate with any reasonable expectation of success.

Art Unit: 1713

The closest prior art to GB 412,391 teaches the use of a printing paste, for application to wool, silk and animal fibers, wherein said printing paste is defined as containing at least urea, hot water, thickening agent ammonium oxalate and/or ammonium tartrate. One having ordinary skill in the art would not have been endowed with any motivation to modify the printing paste by adding thereto a cationic homo-or copolymer and a fabric softener with any reasonable expectation of success.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judy M. Reddick whose telephone number is (571) 272-1110. The examiner can normally be reached on 6:00 a.m. - 2:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
